STEEL 1-CAR CARPORT WITH BOXED EAVE ROOF

CALL NOW TO ORDER!

The back end and sides of this metal one-car carport are closed for increased shielding from the elements, while the front remains open for easy access. Steel frame walls are 1' shorter than the roof length. Choose from our large color selection to match your style and existing structures on your property. Great for one car, truck, or assorted lawn equipment. The boxed eave roof, constructed with horizontal panels, looks great and has a strong, reliable design.

Our single car carports are manufactured with a strong galvanized steel frame and heavy duty roofing panels. Quality side wall paneling helps protect the enclosed equipment from rain, sleet, snow, and the harsh sun. Our innovative truss design, as well as corner and center bracing to reinforce the structure, means our carports are built to last. Ask about anchors for proper grounding of your new building.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask that you have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
